EXPANSION: HEALTH DIMENSIONS IS GROWING

Continuing to answer the growing demand for access to alternative healthcare options, Health Dimensions Pharmacy opened its 2nd location in December of 2011. The new 1,700-square-foot location – Health Dimension’s first in Canton, MI - is located at 6200 North Haggerty Rd Ste 300, inside the PRIZM medical center, near IKEA . The experienced professional team at Health Dimensions Canton promises to continue the tradition of specialty care pharmaceutical care with a focus on custom compounded medications and consulting services .

Pharmacy compounding is the customized preparation of a medicine that is not otherwise commercially available. These medications are prescribed by a physician, veterinarian, or other prescribing practitioner, and are compounded by a state-licensed pharmacist. Before the advent of manufacturing, all medications were custom prepared. Today, custom compounding is done to meet special medication needs or to solve medication problems.

Examples of compounding for special needs include: removal of allergenic ingredients, conversion of solid medications to liquid or topical delivery, flavoring, combining medications, or providing medications that are not available from the manufacturer.

“We are excited to join the Canton community and share the Health Dimensions difference with more residents in the area,” said Scott Popyk, president and CEO of Health Dimensions. “Our distinctive pharmacy provides customers with an opportunity to manage their own health through traditional pharmacy offerings, compounded therapies, nutritional products and professional consulting services.”

“Times are changing rapidly – not only in the business world, but within the health-care field,” Popyk said. “Our region is seeing pharmacies, both independent and chain, close their doors. I have made a promise to serve the community, providing exceptional pharmacy services and careers that employees can count on.”

Health Dimensions Compounding Pharmacy first opened in 1996 and is the leading accredited compounding pharmacy in the Midwest, providing more than 5,000 physicians with compounds for their human and veterinary patients.

Health Dimensions customers develop relationships with the licensed pharmacists and other highly qualified staff as they learn about the variety of health care options available to them.

For more information about the new Health Dimensions location, contact us directly at 800.836.2303 or online at www.hdrx.com

What should you look for when choosing a compounding pharmacy?

Accreditation.

Health Dimensions Compounding Pharmacy, has earned the Pharmacy Compounding Accreditation Board's new Seal of Accreditation for meeting the compounding pharmacy profession's highest quality and safety standards.

The PCAB™ Seal of Accreditation is a new system of standards created by the leading experts in the compounding pharmacy field today. Our accreditation status as a PCAB Accredited™ compounding pharmacy lets you know that Health Dimensions is dedicated to protecting our patients by practicing safe, high-quality compounding.

With the estimated 30 million to 40 million prescriptions that are compounded each year, there has been a need for an enhanced, profession-wide system of standards by which each compounding pharmacy can test its quality processes. While compounding pharmacy is regulated by the state, PCAB Accreditation is an even more comprehensive way to ensure a compounding pharmacy has undergone the profession's most rigorous review and inspection measures.

Quality.

You need a compounding pharmacy you can trust to make the highest quality products. At Health Dimensions, we are meticulous about every prescription we dispense. Our stringent quality control programs mean that every prescription meets the specifications and high standards of the pharmacy industry and you. Each compounded preparation we dispense undergoes multiple checks to ensure quality and accuracy. Health Dimensions is committed to the strict requirements of Chapters <795> and <797> of the U.S. Pharmacopoeia for compounding non-sterile and sterile preparations.

When so much is at stake, it's important to choose a compounding pharmacy you can trust with your health.
