Azuri, J., Hammerman, A., Aboalhasan, E., Sluckis, B., & Arbel, R. (2023). Tirzepatide versus semaglutide for weight loss in patients with type 2 diabetes mellitus: A value for money analysis. *Diabetes, Obesity and Metabolism*, 25(4), 961-964.

What are GLP-1 medications, and why is it considered a viable option for weight management?

Semaglutide & Tirzepatide are types of GLP-1 receptor agonists and the active ingredients in **Ozempic, Wegovy, Mounjaro, & Zepbound**, which are in shortage. These medications mimic a natural hormone that helps regulate blood sugar and makes you feel full. **Patients that have struggled to lose weight, now have an option to boost their efforts.**
